

**Instructor:** Hassan. Bourgoub  
**Course Name:** Calculus II  
**CRN/Section** 01201/11  
**Classroom:** MCC-12  
**Time:** Daily 12:30pm - 1:20pm  
**Office Hours** MTWTh 10:30am -11:20am  
**Office/Phone:** S47A/ (408) 864 8806  
**Email:** [Bourgoubhassan@fhda.edu](mailto:Bourgoubhassan@fhda.edu)  
**Text** Calculus-W/Webassign, by Stewart, Edition 8e

**PREREQUISITES**

DeAnza Math 001C with grade of C or better or the equivalent.

**Minimum Requirements****Attendance**

Perfect attendance is required of every student. You are expected to be in class daily on time and remain through the duration of class. Call every time you miss class. Two consecutive absences **may** constitute dismissal from class. In the event you decide to withdraw from the course, it is your sole responsibility to fill out a drop sheet and submit it to the records office.

**Test performance**

Satisfactory performance on tests and the final exam are necessary for passing the course.

**Homework:**

Homework is an integral part of the course. It is very unlikely for most students to succeed in this class without completing all homework assignments on time. We will use Web-Assign website for course homework and access to the textbook. You are to purchase an access code separately or bundled with a new textbook. The due date for each assignment is available on the site. All due dates are set approximately four days after the relevant material is discussed in class. Fixed due date used to allow for uniform distribution of course load throughout the quarter. Each assignment comprises a number of homework credits equal the number of problems in the assignment. These credits will be at the end of the quarter to a maximum of 120 course points.

**Written Assignments:**

The writing assignments correspond to the sections covered in the textbook. These assignments are available, in PDF format, on my web page under the Assignment Link next to the course schedule. Print each assignment back to back and bring with you to the classroom based on the daily schedule for the course. These assignment are not collected, but they are used to create the three written exams during the quarter.

**Testing**

We are going to have three written tests, three multiple-choice tests, and a final exam. The MC tests are worth 40 points each, 20 points each for the written tests, and the final exam counts for 100 points. There will be no makeup exams. The final exam will be comprehensive and mandatory. Dates for all tests and tests are available on the course schedule on the class's webpage.

### Distribution of Course Grade

Tests	180 pts
WA Homework	120 Pts
Final Exam	100 Pts

---

Total 400 pts

### Materials

The required text mentioned above, a TI84 calculator or the equivalent, loose paper, pencils and a ruler are required course materials.

### Academic Integrity

Refer to Schedule of Classes on college policy under subtitle Academic Integrity ; in addition, cheating and plagiarism is not tolerated and will be decisively met with grade F for test/ assignment, and, or dismissal from class depending on the circumstances.

### Grading:

The course grade is based on the fixed scale below. Grades aren't given to you, they are earned by your desire and willingness to be consistent, persistent and hardworking .

There are three components to the total grade in this course, in-class tests and Quizzes, homework, and a final exam. The Final letter grade is based on the scale below.

### Grade Scale

Letter Grade	Range
A+	97 % and above
A	94 % – 96%
A -	90 % –93%
B +	87% -- 89 %
B	84 % -- 86 %
B-	80 % -- 83 %
C+	72 % -- 79 %
C	65 % -- 71 %
D	50 % -- 64 %
F	below 50 %

**Student Learning Outcome(s):**

\*Graphically, analytically, numerically and verbally analyze infinite sequences and series from the perspective of convergence, using correct notation and mathematical precision.

\*Apply infinite sequences and series in approximating functions.

\*Synthesize and apply vectors, polar coordinate system and parametric representations in solving problems in analytic geometry, including motion in space.
