

Math 1B: Calculus
Fall 2022

Instructor: John Jimenez
Email: jimenezjohn@fhda.edu

Class Time: MTWR 10:30a-12:20p

Note that this course is a part of the Math Performance Success Program.

Program Mission

The Math Performance Success (MPS) program established at De Anza Community College in 1999, aims to help all underrepresented students meet their goals by improving student success in math through innovative and collaborative approaches including extended lecture time, in-class tutoring, and embedded counseling services.

Program Philosophy

The MPS program team members are dedicated to the philosophy that any willing student with the proper support and services can succeed in mathematics. Instructors, counselors, and tutors collaborate to help students complete their mathematics requirements. **The MPS program is designed for students who have had previous difficulty with Math.**

Structure

How does an MPS Math Classroom look like?

Students in the MPS program attend math class for two hours a day, approximately 10 hours a week, double the class time compared to a stand-alone math course. This extended instructional time, provides ample time for lecture, class activities, mindfulness, and group work. Tutors are available during the second part of the class to assist students who have questions about the material. Counselors also use the second hour of this class to check-in on students and make sure they are on track in succeeding in the course.

Important contact information:

Director, STEM Success Program Yvette Campbell, PHD campbellyvette@fhda.edu	MPS Counselor/Coordinator <ul style="list-style-type: none">Melissa Maturino maturinomelissa@deanza.eduSheldon Fields fieldssheldon@fhda.edu
Program Coordinator Deepa Yuvaraj yuvarajdeepa@fhda.edu	Tutors TBA

If you have any questions regarding the program, you can contact myself or anyone listed above. Preferably the counselors.

Required Text and Recommended Materials:

- (Free)Textbook: Calculus Vol II Openstax:
<https://openstax.org/details/books/calculus-volume-2>
- Calculator: Although not necessary for most of this course, it can sometimes be helpful to have access to some type of graphing calculator. This can be a physical graphing calculator

or free online graphing tool such as <https://www.desmos.com/> or <https://www.wolframalpha.com/>.

- Access to <https://deanza.instructure.com/>. Canvas is where all the course information will be available. Information regarding grades, lectures, resources, etc.

Goals for Students in the Course:

- To build a solid foundation for future calculus courses.
- To build confidence in their academic abilities in the math class and beyond.
- Be able to collaborate and discuss mathematics with classmates.
- To gain intuition behind concepts in the course.

Grading:

3 Midterm Exams	Homework	Discussions	Final
40 %	40 %	5%	15 %

Grading scale	
90-99.9% A	70-77.9% C
88-89.9 % B+	68-69.9 % D+
80-87.9% B	60-67.9% D
78-79.9% C+	≤ 59.9 F

Exams 40 %: There are 3 midterm exams. The lowest midterm exam score will be dropped.

Content Check-In 35 %: Content check-ins are packets you turn in weekly. The packet will consist of two parts that you turn in together. One part will be a collection of exercises assigned during the week and the second part will be a quiz composed of exercises that are related to exercises assigned during the week.

Projects 5 %: There will be one project to enrich your understanding of topics studied in the course and beyond.

Discussions 5 %: There will be some informal discussion board topics to build a sense of community.

Final 15 %: The final for this course will be a two-hour cumulative exam. The final exam time for this class is on Thursday 06/23/2022 from 9:15 AM to 11:15 AM.

Figure 1: Grade breakdown for the course as a percentage.

Assignment submission recommendation: All assignments will have due dates posted but I will still accept your assignment if it is not completed by the due date. If for some reason you cannot turn in an assignment, turn it in as soon as possible. This is to avoid falling behind with the material which can be detrimental toward your experience in any STEM course.

Attendance: This class will be synchronously held via Zoom (link posted in Canvas).

You may be dropped from the course if:

- You miss 2 homework sets and or quizzes in a row.
- You do not interact with Canvas for a week.
- You miss 2 full weeks of synchronous meetings without contacting me prior to missing those meetings.

Note that if for any reason you feel like you may need to drop the course, it is your responsibility to do so.

How to Succeed in this Course:

- The Student Success Center tutors and workshops area a great place to start! Watch the [SSC Welcome Video](#) to learn more.

Tutoring:

For tutoring through MPS visit <https://www.deanza.edu/mps/mpstutoring/index.html>.

For tutoring through The Student Success go to <http://deanza.edu/studentssuccess> and click to join a Zoom tutoring room during open hours.

Workshops: Attend a [Skills Workshop](#), a [content-specific math/science workshop](#), an [Accounting chapter review workshop](#), or a [Listening and Speaking workshop](#).

Resources: Join the [SSC Resources Canvas site](#) to see content and learning skills links.

After-hours or weekend tutoring: See the [Online Tutoring](#) page for information about NetTutor (via Canvas) or Smarthinking (via MyPortal).

It is known that students who participate in tutoring, group study, or workshops for three or more hours a week succeed at much higher rates than those who do not. The students who most need the help may reluctant, but if you take the first step in seeking resources you will be glad you did.

- I encourage students to ask me any questions about the course content if they wish! You can reach me from 9:30-10:20a M-Th via [Zoom](#). This is another great place to get help on material related to the course.

Disability Statement: If you have a disability related need for academic accommodations or services in this course, you will need to provide me with a Test Accommodation Verification Form (TAV form) from Disability Support Services (DSS) or the Educational Diagnostic Center (EDC). Students are expected to give a two week notice if they are in need of accommodations. For those students with disabilities, you can obtain a TAV form from their DSS counselor (408 864-8753 DSS main number) or EDC advisor (408 864-8839 EDC main number). The application process can be found here: <https://www.deanza.edu/dsps/dss/applynow.html>

Academic Integrity: If it is suspected that academic dishonesty is taking place on an assignment, the college will be notified and will result in a failing grade on the assignment or a failing grade in the class. For further information on academic integrity please see https://www.deanza.edu/policies/academic_integrity.html.

Tentative Course Schedule:

Week	Section
1	Areas and Distances The Definite Integral The Fundamental Theorem of Calculus
2	Indefinite Integrals and the Net Change Theorem The Substitution Rule Areas Between Curves
3	Volumes Volumes by Cylindrical Shells
4	Project assigned Work Average Value of a Function Exam 1
5	Integration by Parts Trigonometric Integrals Trigonometric Substitutions
6	Integration of Rational Functions by Partial Fractions Approximate Integrals Exam 2
7	Project due Improper Integrals Arc Length Area of a Surface of Revolution
8	Applications to Physics and engineering Probability
9	Modeling with Differential Equations Direction Fields and Euler's Method
10	Separable Equations Exam 3 Models for Population Growth
11	Linear Equations
12	Final Exam Monday 6/21 from 11:30 AM to 1:30 PM

Important Dates:

Date	
Sept 26	First day of Fall quarter
Nov 11	Veterans Day – no classes
Nov 18	Last day to drop classes with a W
Nov 24-27	Memorial Day Weekend - no classes, offices closed
Dec 12-16	Finals Week Final is on Thursday 12/15/2022 from 9:15 AM to 11:15 AM

Course Description: This course examines the fundamentals of integral calculus. (5 units)

Student Learning Outcome(s):

*Analyze the definite integral from a graphical, numerical, analytical, and verbal approach, using correct notation and mathematical precision.

*Formulate and use the Fundamental Theorem of Calculus.

*Apply the definite integral in solving problems in analytical geometry and the sciences.
