

MATH 32– MP1 Precalculus II

Asynchronous Learning on Canvas

Online (Canvas) CRN: 26637

Instructor: Nahrin Rashid

Email: rashidnahrin@fhda.edu or Canvas Inbox

Weekly meeting via Zoom: Monday & Wednesday 1:30 – 3:45 PM

Office hours via Zoom: Monday & Wednesday 11:00 AM – 12:45 PM or by appointment

Meet MPS Counselor/Coordinator: Melissa Maturino

Email: maturinomelissa@fhda.edu

Google Voice Number: 408.982.7307

Office: S56A |Office Phone: 408.864.8249

Melissa will be on campus every Monday - Thursday 8:30 AM to 4:30 PM (on campus Mondays). You can schedule 1-1 appointments to meet with her. Melissa will be joining our class every Monday and Wednesday from 1:30 – 2:30 PM to answer any counseling questions that you may have.

Tutoring Services: Do not wait to get extra help. Contact me or tutoring to get help!

Our MPS [Virtual Tutoring Center](#) hours are:

Monday - Thursday: 10am - 6pm

To join the Virtual MPS Tutoring Center, click [HERE](#). No appointment needed!

How to reach out: If you have a question, the quickest and easiest way to contact me is via the Canvas inbox or email me rashidnahrin@fhda.edu. If you email me during my online office hours, I'll try to respond immediately. If you email me outside of my office hours, then I'll try to respond to you within 48 hours. From our course, click on "Inbox" in the left global navigation menu to access your Canvas conversations.

Online Lecture & Weekly Meetings: We have class every Monday and Wednesday from 1:30 – 3:45 PM via Zoom to check in with you and answer any questions you may have. You are expected to attend these meetings. Plan to log in to Canvas several times each week. I will post pre-recorded lecture videos for each section on Canvas under Modules. You'll need to watch the lecture videos and take notes. If you have any questions, you can ask me during class or office hours or email me. You will be learning online or asynchronously, meaning that at your own pace, you will watch lecture videos, complete homework assignments, and take either a quiz or an exam every week. There will be set due dates for all of the homework assignments, quizzes, and exams. Although you will be able to watch the videos at your own time and pace, you are expected to complete them in a timely manner so that you are ready to take the quiz/exam and submit them by due date. It is very easy to fall behind in an online class, so you are encouraged to set aside at least 1 to 2 hours each day to dedicate to this class as opposed to doing all of the work in one day. It is strongly recommended that you download the Canvas app if you have a smart phone.

Prerequisite: MATH 31 or MATH 31B (with a grade of C or better); or appropriate score on Calculus Placement Test within the past calendar year.

Course Description: Preparation for calculus: extending the elementary functions of first quarter precalculus to include the theory of periodic functions; composition of trigonometric functions with other elementary functions; polar coordinates; further exploration of the complex plane; introduction to the algebra of vectors.

Textbook: Precalculus with Limits; 5th edition by Ron Larson bundle with Webassign access code.

Calculator: A basic scientific calculator is required for this class such as Texas Instruments TI30XIIS Scientific Calculator. TI-83 Plus/TI-84 Plus calculator recommended but not allowed on Exams. This can be a physical or an online app, such as the one at <https://www.desmos.com/scientific>.

Software: All homework/quizzes will be done online using WebAssign which is an internet-based software. You will need to register at www.webassign.net to use this internet-based software. You will need the class key given by me in order to self-register. **Class key for WebAssign: deanza 6209 1209**

Student Conduct: You are expected to be honest and ethical at all times in the pursuit of academic goals. When completing your work on an assignment or in taking a test, be sure to do your own work. Copying or using another person's work is plagiarism or cheating, so please be sure to submit your own work. Anyone caught cheating on an exam will receive an automatic 0 and be reported to the Dean of the PSME Division.

Discussion on Canvas: Even though this is an online class, you are expected to participate. Post and answer questions in Canvas weekly discussion boards. These discussions will count for 5% of your grade.

Homework: Plan to log in to WebAssign daily. Homework will be assigned a few times a week and will have a due date. All homework must be submitted by 8:00 AM on the due date. You must set up an account by Monday, October 3, 2022 or you will be dropped from the class. If you have a homework problem you are not able to complete, you can send me your questions on WebAssign by clicking on "Ask my Instructor" or ask me during office hours. At the end of the quarter your lowest homework score will be dropped. Homework will count for 15% of your term grade. Please do not procrastinate! You can request extension on the homework up to five times during the quarter.

Class key for WebAssign: deanza 6209 1209

Quizzes: There will be a quiz every week via WebAssign assigned intermittently throughout the term to test your skills on the concepts we are covering in class and online. Once you start the quiz, you will have 1 hour to complete it, and you will get two attempts on each quiz. **NO** make-up quiz will be given. These quizzes will count for 20% of your grade.

Midterms: There will be four exams during the quarter on WebAssign and Canvas. Each exam will have two parts: an online portion through WebAssign and a handwritten portion which you will upload to Canvas. Once you start the online portion of the exam, you will have 2 hours to complete it. These exams will be completed online and will contain the materials covered in the lectures, online, and in the book. If you are unable to take an exam for any reason, **a makeup exam will not be given.** To compensate for this, I will drop your lowest exam score. These exams will count for 40% of your term grade.

Final Examination: If you do not take the final exam, you **WILL NOT** receive a passing grade. There will be a comprehensive final examination on **Monday, December 12.** This test will count for 20% of your term grade.

Accessibility Accommodations: If you have a documented disability and wish to discuss academic accommodations, or if you would need assistance in the event of an emergency evacuation, please inform me as soon as possible.

Important Dates

- The last day to add classes is Saturday, October 8.
- The last day to drop for a full refund and without a “W” is Sunday, October 9.
- Veterans Day holiday – no classes; offices closed, Friday, November 11.
- The last day to drop classes with a “W” is Friday, November 18.
- Thanksgiving holiday – no classes; offices closed, November 24-27.
- Last day to request “Pass/No Pass” is the last day the class meets in the current quarter.
- Final Exam Week – December 12-16.

Grade Breakdown

A+: 99% and above	B+: 87 - 89%	C+: 77 - 79%	D: 63 - 66%
A: 93 - 98%	B: 83 - 86%	C: 70 - 76%	D-: 60 - 62%
A-: 90 - 92%	B-: 80 - 82%	D+: 67 - 69%	F: < 60%

Tentative Schedule for Math 32, Fall 2022

Week 1	Section 4.1, Section 4.2
Week 2	Section 4.3, Section 4.4
Week 3	Section 4.5 Exam 1: Tuesday, October 11 (Section 4.1 – 4.4)
Week 4	Section 4.6*, Section 4.7
Week 5	Section 4.8, Section 5.1
Week 6	Section 5.2, Section 5.3 Exam 2: Thursday, October 27 (Section 4.5 – 4.8)
Week 7	Section 5.4, Section 5.5*
Week 8	Section 6.1*, Section 6.2* Exam 3: Monday, November 14 (Section 5.1 – 5.5)
Week 9	Section 6.3, Section 6.4
Week 10	Section 6.5, Section 6.6
Week 11	Section 10.7, Section 10.8 Exam 4: Friday, November 2 (Section 6.1 – 6.5)
Week 12	Finals Week Final Exam: Monday, December 12 Comprehensive

This syllabus is subject to change at the instructor's discretion.

4.6: Damped graphs optional

5.5: Only double-angle and half-angle formulas are required, all others are optional

6.1, 6.2: Area formulas are NOT required

Student Learning Outcome(s):

* Formulate, construct, and evaluate trigonometric models to analyze periodic phenomena, identities, and geometric applications.
